

JOTUN

GARDEX

ECOGLOSS

WATER-BASED WOOD & METAL PAINT

Better air quality indoors and outdoors

Less smell during and after painting

Dries 4X faster than oil-based paints

Durable colours and gloss finish keeps your home looking new over time

100% Formaldehyde, Heavy Metals and APEO free

Prevents growth of fungus that is unsightly and causes wood to rot

Extends the beauty and durability of metal by protecting it from corrosion

Maintains whiteness and original colour far better than oil-based paints

MULTICOLOR Tintable

Wide range of colours to suit your personal tastes.

Kindly refer to Gardex Premium Gloss colour card.

Gardex EcoGloss is a certified environmentally friendly paint for interior wood and metal surfaces that brings you cleaner air to breathe and a more comfortable space to live in. It gives you premium, longer lasting beauty and protection for your home while creating a more sustainable world.

12 months after painting

Non-Yellowing

Compared to oil-based paints, **Gardex EcoGloss** maintains whiteness longer with its special water-based formulation.

Oil-based paint

Recommended Paint System

For Interior Wood and Metal Surfaces

1 coat of Gardex EcoPrimer

2 coats of Gardex EcoGloss

Gardex EcoPrimer is a water-based primer that provides better adhesion and performance, especially for bare wood and metal surfaces.

Surface preparation	: Ensure that surfaces are clean, dry and free from dust, oil and grease. Loose material and rust must be removed.
Thinning	: Paint is ready to use after proper stirring. If required, it may be diluted with water up to a maximum of 5%.
Application	: By brush, roller or spray.
Surface dry	: 1 hour
Recoating time	: 2 hours
Coverage	: 9 – 12 m ² /litre
Cleaning up	: Clean equipment with water immediately after use.

We achieve this with Gardex EcoGloss by eliminating the use of harmful chemicals such as:

-  **APEOs** (Alkyl Phenol Ethoxylates) - Surfactants commonly used to make detergents and paints. They are poorly biodegradable and toxic to aquatic life.
-  **Formaldehyde** - A preservative and adhesive component for paints and engineered wood. It can cause allergic reactions and is carcinogenic.
-  **Heavy Metals** (lead, cadmium, chromium, mercury) – Ingredients for colour pigments. They are toxic and cause poisoning in humans and other living organisms.

"As times change, so do the solutions."

As part of Jotun GreenSteps initiative, all of our certified products are thoroughly researched and stringently produced to ensure highest possible performance delivery with minimal environmental impact.

Gardex EcoGloss is part of our rapidly growing family of eco-conscious products, specially designed to provide holistic support to responsible property development professionals – from exterior and interior paints – right down to wood and metal finishes.
